the U.S. copyright on this publication was renewed.]**

***Blinded by an atomic blast, Dan Gresham
joins forces with the radiant Swimmers
to preserve an undersea civilization!***

The *Albacore* was eight hundred miles out of Suva, feeling her way through the Pacific toward a destination unmarked except on the charts. She was a Navy cruiser jury-rigged into a floating laboratory, Navy manned, but carrying a dozen specialized technicians as passengers.

For days she had waited outside the danger area, till circling planes radioed word that the test atomic blast had apparently subsided. Then the *Albacore* went into a flurry of preparations. It was a miracle that the watch had sighted Gresham in his rubber boat, and a triple miracle that he was alive.

His eyes bandaged, he sat out on deck, while Black, the neurologist, leaned on the rail beside him and stared aft. Presently Black took out a pack of cigarettes, automatically held it out to Gresham, and then remembered that the man was blind.

"Cigarette?" he said.

"Yes, thanks. Is that you, Dr. Black?" Gresham's voice was very low.

"Uh-huh. Here. I was watching that shark. He's followed us from Suva."

"Big one?"

"One of the biggest I ever saw," Black said. "That's the baby who tried to take a chunk out of you when we picked you up. He kept biting at our oars!"

"A pity he didn't get me," Gresham said. He tossed the cigarette away. "No use. If I can't see the smoke, I can't enjoy it."

The neurologist studied his patient.

“We don’t know that you’re permanently blinded, after all. This is so new.”

“I was looking straight at it,” Gresham said bitterly. “It must have been miles and miles away, but I could feel it burning my eyes out in one flash. Don’t tell me!”

“All right. I won’t. But this is a completely new type of atomic blast. It isn’t uranium. It’s a controlled chain reaction based on an artificial element—there must be new types of radiation involved.”

“Fine. The next time there’s a war, we can blind everybody.” Gresham laughed grimly. “I’ll be sorry for myself for a few months, probably. Then I’ll get a Seeing-Eye dog and become a useful member of society again. Huh!” He paused. When he spoke again his voice was different, doubtful, as if he didn’t quite realize he spoke aloud. “Or maybe not,” he said. “Maybe I’ll never be—useful—any more. Maybe I’m not just imagining....”

“Imagining?” Black said, interested. “What?”

Gresham jerked his bandaged face away.

“Nothing!” he declared sharply. “Forget it.”

Black shrugged. “Tell me about yourself, Gresham,” he suggested. “We haven’t had much time yet to get acquainted. How did you happen to be out here just now?”

Gresham shook his head irritably. “Just at the wrong spot and the wrong time? Maybe it was meant that way from the start. Predestination—how do I know? Oh, I had enough after the war. I bummed around the islands. I—like the sea.” His voice softened. “Like isn’t strong enough. I love the sea. I

can't stay away from it. There's a fascination—I signed on here and there as a deck-hand, a stevedore—I didn't care what. I just wanted to soak myself in the big things. Sun and sea and sky. Well, I can still feel the sun and the wind, and I can hear the water. But I can't see it."

There was no real conviction in the way he finished that last sentence. He turned his bandaged eyes a little to Black's left and his face grew strained, as if he were looking at something far out at sea.

"You know about the radar sonics, don't you?" the neurologist said.

"Oh, sure. I'll learn to bounce a radar beam around me and keep from walking into walls. But—" Gresham's voice died. He seemed to be staring as if through the bandages and his own blindness at something far away. In spite of himself Black turned to follow that blinded stare. And at a great distance off he saw, or thought he saw something in the glare of the sun-track splash water and dive....

"Dr. Black," Gresham was saying in that strained, doubtful voice. "Dr. Black, how are you on psychiatry?"

"Why, fair." Black kept the surprise out of his tone with an effort. "Why?"

"Have you noticed any symptoms of—aberration in me?"

"Nothing unusual. Nervous shock, of course. That atomic blast catching you certainly would have caused a strain."

Gresham said, "After the blast went off I floated for I don't know how long before you picked me up. I—started to imagine things. Delirium, you could say. But I don't know. I—forget it, will you? Maybe later I'll feel like talking. Just forget I said anything, Dr. Black."

After all, there was nothing to talk about, to put into coherent words. For what had happened was inexplicable. It

was part of the terra incognita that the key of nuclear energy had unlocked.

Even Daniel Gresham, drowsing the years away in his tropical lotuslands, could not help hearing about the new atomic experiments. He had stopped keeping track of time back in 1946, because around the archipelagoes time was a variable, and hours could last for seconds or months, depending on whether you were at a *kava-kava* festival with the golden-skinned Melanesians or simply stretched flat on the warm deck, while white canvas billowed overhead and waves splashed quietly along the keel.

But the radio wouldn't stop talking. It talked about the uranium piles constructed for experiments, and the new lithium hydride methods, and the technicians who were endlessly charting, testing, studying—and finding fresh mysteries always beyond. And this latest test—a completely new type of atomic blast, one that had never existed before on earth, except, perhaps, so long ago that the planet was a white-hot, molten mass.

Briefly, the holocaust had blazed out and vanished. But it had left traces in the instruments planted in the path of the fury, and it had left its trace, too, in an intricate, sensitive instrument cage inside Daniel Gresham's skull.

Thoughts can be measured; they are electric energy. The machine that transmits them can be functionally altered. And, adrift on his raft, Gresham had found a very strange substitute for his lost vision....

The *Albacore's* boat came back with recording instruments from a floating buoy, and Black paced slowly up and down the deck, studying a coil of paper and trying to ignore the piping of sea-birds that flapped overhead, and the look of strained attention on Gresham's face. It didn't belong there, on a blind man's face. Gresham sat as he had sat yesterday,

bandaged eyes turned toward the sea beyond the boat as if he could see something out there invisible to ordinary eyes.

“Doctor, what does that look like out there?” he asked suddenly.

Startled, Black followed the direction of his pointing finger.

“Why, a porpoise, I think. It—no, now it’s gone.” He stared at his patient in amazement. “Gresham, are you still blind?”

Gresham laughed softly. “There’s a bandage over my eyes, isn’t there? Of course I’m blind.”

“Then how did you know about the porpoise?”

“It isn’t a porpoise.”

Black took a long breath. “What the devil’s the matter with you, Gresham?” he said.

“I wish I knew. I—” Gresham’s voice hesitated. Then he said with a sudden rush, “You could call it hallucination. I can see things. But not with my own eyes.”

“Yes?” Black’s tone was hushed. He was terribly afraid of interrupting this mood of explanation. “Go on.”

“Right now, for example,” Gresham said in his soft voice, “I’m seeing this ship, from about half a mile away. I can see the smoke, and the little figures on deck. I can see myself, and you. From a distance. Once in a while a wave blocks my sight. You’re holding something white.”

Black stared off into the blue distance, where what had seemed a porpoise had broken water once and vanished. He could see nothing but ocean now.

"I told you I started imagining things on the raft," Gresham went on. "I kept seeing things from different angles. I knew I was blind, but there were flashes ... green vistas ... blue sky and white clouds...."

"Memory. Imagination."

"It isn't a porpoise," Gresham said.

Black made an effort and pulled his mind into better coordination.

"Now listen," he said. "All right. You were in the direct path of some new radiations. These figures—" He rustled the paper in his hand. "They don't check exactly. There *was* an untyped form of radiation in this area after the atomic blast. But—" He went off at a tangent. "It isn't a porpoise? What is it, then?"

"I don't know. It's intelligent. It's trying to communicate with me."

"Good Heavens!" Black said, genuinely startled now. The look he bent upon Gresham was dubious.

"I know, I know." Gresham must have sensed in the silence that doubtful glance. "Maybe I'm making it all up. I did spot the—porpoise—but maybe my hearing's improved. The rest—well, I haven't got any proof except what I know I've seen—and felt. I tell you, it's something intelligent out there. It's trying to communicate and it can't." He rubbed his forehead above the bandages, his face taking on the old look of strain. "I can't make sense out of it. Too—alien, I guess. But it's trying hard...." Suddenly he laughed. "I can imagine how you're looking at me. Would you like to try some tests, Dr. Black? Knee-jerks, maybe?"

"Come on below with me," Black said briefly. Gresham laughed again and got up....

An hour later they were back on deck. Black looked worried.

“Listen, Gresham,” he said earnestly. “I don’t know what’s happened to you. I admit that. The encephalogram was—puzzling. Your brain emits radiations that don’t check with anything we’ve seen before. Some peculiar things are possible, theoretically. For instance, a radio isn’t really likely to pick up transmitted waves, but it does. And telepathy’s theoretically possible. Suppose your brain has been altered a little by your exposure to the atomic blast. There are powers latent in the human mind, new senses that we know little about.”

“I suppose you have to find new words for it,” Gresham said as Black stumbled and paused. “But I don’t care what the scientific diagnosis is. I can see again. Not with my own eyes. But I can see.”

He was silent for a moment, and to Black it seemed that the blind man’s whole face looked rapt, as if he gazed upon things more beautiful than a man with eyes ever saw. When Gresham spoke, his voice was rapt, too.

“I can see!” he repeated, almost to himself. “I don’t care what else happens. Something alive and intelligent and—and desperate is near me. I see through its eyes. Its thoughts are too different to understand. It’s trying to tell me something, and it can’t. I don’t care. All I care about is seeing, and the things I see.”

He hesitated.

“Beautiful,” he murmured. “All my life I’ve loved beautiful things. That’s why you found me out here, in the tropics, away from cities and ugliness. And now!” He laughed a little and his voice changed.

“If I could see your face, I wouldn’t be talking this way,” he said. “But I can’t, so I can say what I feel. Beauty is all that matters, and in a way I’m glad even this has happened, if it means I can go on seeing things like—like this.”

“Like what?” Black leaned forward tensely. “Tell me.”

Gresham shook his head. “I can’t. There aren’t any words.”

The two men sat silent for awhile, Black frowning and studying the rapt, blind face before him, Gresham staring through his bandages and through the eyes of another being, at things he could not speak of.

Something glistened among the waves, very far away, turned over in the water and sank again.

The next morning, Gresham did not awaken. To Black it resembled catalepsy. The man lay quietly, his heart faintly beating, his respiration almost stopped. Once or twice a ripple of motion crossed his features and he grimaced. But that was all. He lay for a long while, half-alive.

But he was double alive, triply—a hundredfold—elsewhere.

Around dawn it began to happen to him, he thought afterward. He felt first a something reaching out for him. His internal vision kept catching glimpses and then snapping shut again like a camera lens. There was a thought, beating against a barrier, trying to get through to him. But it was too alien. It could not reach through.

Gresham’s half-sleeping mind could not understand. He reached out into other minds around him, seeking contact. Bird minds—sparks of life rising and falling on the winds, dim, formless bits of cloud. And other small minds, in the waters, vague, weaving through green voids. But in the end he always came back to the Swimmer.

And in the end, the Swimmer must have realized it could not communicate, knew at last there was only one way left. It

had to show him what it wanted to tell. And there was only one way to show him.

So it swam down, down in the pearly light of dawn, with the sea and sky an enormous emptiness and the *Albacore* a small dark shape miles away, and Gresham's body hidden within it, asleep, while his mind sank with the Swimmer through the fathomless seas.

Down and down, into the great deeps under the atolls, where abysses lie deeper than Everest is high. The Swimmer could plumb them, for the Swimmer was not human. Intelligent, yes, but—different. Life under the waters would follow a different course from life in the air. And cities under the sea would be very different, too.

Gresham had never known this feeling of bodily freedom before. He shared with the Swimmer the physical sensation of motion in a supporting medium through which he could move freely in any direction. It was a strange, strong body that housed his mind temporarily, but no visual image of it formed.

There were sensations of indescribable difference—a smooth, flowing, muscular thrust that exploded into bursts of action as he drove downward. And an aching, straining discomfort gradually ceased as he sank. The race of the Swimmer was meant to live in the pressure of the deeps, and now the pressure began to fold in comfortingly. Once more the Swimmer's body felt completely its own, and that deep, sensuous pleasure made it take an intricate path downward, as a bird plays in its own element or a dolphin gambols in the waves.

The dark began to close in. But Gresham began to be aware of a new, strange light from below, an unearthly dawn, in a light-band no human eyes could ever see except in this incredible manner. He could never describe the color of the

abysmal dawn, a tremendous slow brightening of sunless day permeating the vastness of underseas.

Shadows of the deep water swam past, shapes of terror and mystery and fantastic beauty. Once the leviathan bulk of the great whale went by, and once a goblin picnic of tiny colored lanterns—fish with luminous spots driving in an insanely gay flight before the shadow of a barracuda that swept like death after them.

But the sea-bottom was dark. Perhaps only in some spots was this land of veiled shadows to be found. The immense glow of the submarine dawn drew itself in and focused on small areas as Gresham's mind went downward with the Swimmer. And then a gargantuan black wall, without top or end or bottom, loomed before him.

Perspective swung round dizzily, and Gresham saw that it was no topeless wall, but the bottom of the sea. Crags lifted from it. Atolls and hills jutted into the faint fringes of light, crawling with weeds, blanketed with undersea growth. But the great plain and the valleys were in shadow.

Anchored by glowing ropes that vanished in darkness below, swung latticed spheres of light. There were dozens of them, like shining toy balloons expanding in size as the Swimmer swept nearer and nearer. Across the lattices a troubled whirling ran, shaking vortices of darkness that made the spheres fade and brighten like lanterns, and then pulse into dimness again.

The Swimmer's headlong sweep, like flight through green air, carried Gresham straight toward the nearest globe. Between the lattices an opening like a shutter widened, gaped, closed.

And this was a city of the underseas.

For five days Gresham's body lay all but motionless in his bunk on the *Albacore*, while the ship drove forward over fathomless abysses where Gresham's mind moved among mysteries. Dr. Black spent as much time as he could spare beside the cataleptic sleeper, watching the vague shadows of expression that moved now and again across his face—wonder, sometimes revulsion, sometimes strain and dread. But only the shadows of the real emotions which Gresham's mind knew, far away.

On the fifth day he woke.

Black saw his hands rise quickly to the bandaged eyes, and Gresham sat up abruptly, making an inarticulate sound in his throat. His face for a moment was wild with dismay and horror.

"It's all right," Black said quietly. "It's all right, Gresham. You've been asleep and dreaming, but you're safe now. Wake up!"

"Safe!" Gresham said bitterly. "Blind again, you mean. And —" His face convulsed once in a grimace of revolt; then he had himself under control and his hands which had been clawing futilely at the bandage as if they could pull away blindness from his eyes, fell quietly to the blanket.

"What was it?" Black asked. "You were dreaming? Would you like to tell me?"

It did not come all at once. The story covered many days in fragmentary sessions, but in the end Gresham told.

"You'll find a diagnosis to cover it," he said to Black. "You'll have to decide I'm a schizophrenic—is that the word—and

I'm having hallucinations. It doesn't matter to me. I know what happened. There were cities down there...."

He had never known true beauty until he moved with the Swimmer through those incredible floating towns under the water. Our own race, chained by fetters of gravitation to the ground, never knew such wonders. Our bodies have been deformed, unsuccessful adaptations ever since we learned to walk upright. But a species without enslavement to gravity, developing in sheer beauty and sheer freedom, perfectly adapted to their green aquaeous world, had come into existence underseas.

"They can build as they like," Gresham said softly. "Gravity doesn't affect them, you see. There were houses—if you could call them houses—made in spirals and coils and spheres. They can float free within the globes if they like. Some of the houses move in orbits. Some of them—oh, I can't tell you. I lived there with them for a long while, but I can't describe them and I can't tell you what the people were like. There aren't words.

"He had to take me down to make me understand what he wanted. The Swimmer, I mean. But his city, like his mind, is too alien to tell about. I can only say it was beautiful, the kind of beauty I've loved all my life and tried to find for years. I'm going back down there, Black."

"Why?" Black had a note-pad on his knee and his pen was moving smoothly across it as Gresham's quiet voice went on. "Tell me about it, Gresham."

"It was the atomic explosion," the blind man said. "The radiations released some sort of balance, away down there, and their machines aren't working as they should any more. That's what caused those whirlpools of darkness in the light and made the lattices around the cities shake. And they

need the lattices. They have an enemy down there—another race, or maybe a branch of their own race.

“It’s strange to think of wars going on down there just as they have here, and one race enslaving another, as the Swimmer’s people did. I thought at first they were—well, call it evil. I saw how they ruled. Evil is a foolish word. The Swimmer people are so beautiful and strong and wild, you can’t apply our rules to their lives. I lived among them. I saw that other race, in the dark of the sea-bottom, banished from that wonderful, strange light a human couldn’t even see.

“At first I thought it was cruelty that kept the—the others—enslaved. And then I happened to see one of the Others.” His voice faltered and a shadow of revulsion crossed the bandaged face. “I saw what was left after a minor uprising, and I saw how the Others kill, and what they look like. After that I knew. If the decision were mine, I’d exterminate them all. I can’t help that feeling. It’s instinct. There are things too degenerate to live.

“It’s all been going on down there for I don’t know how many centuries, how many milleniums. Think of it, Black! Empires rising and falling, races ruling and races enslaved, sciences developing along lines we’ll never understand and nobody guessing it until the Swimmer came to the surface.

“His race is intelligent. They must have realized the new radiations and the explosion had come from another intelligent race. They’ve seen sunken ships and drowned men, they knew we lived here in the air. But they’re so alien ... No communication is really possible between us. If it weren’t for the accident that did—whatever it did—to my brain, no human might ever have known.

“Well, I’m going back. There’s trouble down there. They need help.” Gresham paused and laughed harshly. “Why do

I keep thinking I can help them? I can't even share their thoughts. All I can do is find some creature to take me down into the depths, so I can see with its eyes. I can watch, if I can't help. I can move through those wonderful cities again, and see the Swimmer's people." His voice faltered and he gave his mind up for an instant to the memory of that race and its beauty and wildness and strange, alien enchantment.

"The Swimmer himself had to stay," Gresham said. "The machines—you'd never guess they were machines to see them—weren't working well. All who could had to help the machines, help to keep the dark race—the Others—away from the cities. So the Swimmer's mind let go of mine and I had to come back."

"What can you do?" Black asked. "Is there any way to get in touch again?"

Gresham turned his blinded face toward the ocean. He was silent for a moment.

"That shark," he said. "The big one. He's still following us."

Black had to rise and lean over the rail to make sure.

"Yes, I can see him now. He's with us."

"That'll do," Gresham said confidently. "An intelligent mind can control a non-intelligent one for awhile. I'll take the shark's body and go back."

"You're tired, Gresham," Black said. "We can talk about this later. I'm going to give you a sedative and I want you to rest."

Gresham laughed. "See that gull up there? What would you say if it circled three times and landed on the rail beside

you?"

Black looked up. The gull sailed in one wide circle, two circles, three—and swooped down toward the rail. Its yellow feet gripped and closed and it perched there turning its head from side to side and looking at Black with eyes that fantastically seemed to him for a moment Gresham's eyes, as if the blind man in the bird's dim brain looked out and saw him.

Gresham laughed again.

"You've got a notebook on your knee," he said. "You have no idea how queer you look through a bird's eyes, Black. All out of focus and strange."

"Let it go," Black said in a choked voice. The gull tipped forward and spread its wings, its eyes going blank again with mindless bird-thoughts.

"Yes," Gresham said. "The shark will do...."

Black sat beside the bunk and watched the sleeping face of the blind man, his own mind in a turmoil. He could not believe or accept Gresham's story, but in spite of himself he found images slipping through his brain as he saw emotions flicker across the cataleptic face. He saw the green abysses gliding by, he saw the nameless undersea dawn brightening in the depths, felt the great shark's body bend its banded muscles and drive on and on toward a city of floating spheres that illuminated the dark like lanterns lighted by no human hands.

Suddenly Gresham sat straight up among the blankets. The blood rushed into his face and he said, "Huh!" in a choked, inarticulate voice.

"Gresham?" Black said, laying a hand on his arm. "Are you awake? What is it?"

He was not awake. He did not turn his head or feel the hand or hear the voice. All his faculties were focused on something very far away, deep down in the abysses beneath the boat. He was like a man in a nightmare. His breath came fast now, through bared teeth, and his face convulsed into the lines of a man fighting for his life.

“The dark!” he said thickly. “The dark! Where did the lattices go? What’s wrong? Oh, what’s happening here?” But that was the last articulate speech he made, and the last words Black had time to hear, for suddenly Gresham began to struggle violently with the blankets, striving to throw them off, lashing out with clenched fists whenever Black tried to hold him.

In the end they had to strap him to the bunk to keep him from injuring himself and those around him. He lay there struggling furiously, resting in panting silence and then fighting against the restraining bands again. His face was wild with a ferocity that sent cold shivers through Black’s mind, a less than human ferocity.

And in the writhing of his body against the straps, in the way it bowed and lashed straight again, and the strangely fluid motions of his struggle, Black tried not to think he saw the movement of a shark’s body fighting in deep water against an alien foe.

“Blood!” Gresham muttered, deep in his throat. “Blood—so much blood—can’t see, but—there’s another—kill, kill! Kill them all!”

And it seemed to Black that the little cabin was dark with the dark of the undersea and blinded with blood that spread through the dim water, and boiling with the terrible combat of an unknown struggle.

He knew to an instant when the shark died. He could tell by the last spasmodic convulsion of Gresham’s body on the

bed, the double lashing motion and the sudden silence. He even thought he saw for an instant the blankness of death itself flicker across Gresham's face, the brush of it touching the edges of the mind that had controlled the shark's mind.

After that there was only silence, and the slumber of deep exhaustion....

"It was too late," Gresham said. His voice was a whisper, hoarse from the shouting he had done through his nightmare. His body was bruised from struggling against the straps, and his mind was sick and tired.

"It must have been too late from the moment the explosion went off, if anyone had known. But they still hoped. They sent the Swimmer up and they brought me down, hoping until the last I could do something." He laughed briefly, a croaking sound in his raw throat. "I might have known it was too wonderful to last. The cities and the people—they were never meant for human eyes to see. I was lucky to get even the one glimpse I had. And maybe it's just as well. The two cultures never could have met. If there were any way for humans to reach them, we'd only have destroyed their culture as we've destroyed everything else that's beautiful. As we'll destroy ourselves, when the time comes.

"We did destroy them, Black. The explosion did it. And maybe this was the best way, quick enough, after all."

"But what was it? What happened?"

The face beneath the bandages was grim.

"I went down with the shark. I could see from a long way off that something had gone wrong. Only a few of the cities were lighted, and one of them flickered out as we came

near. And in the underwater dawn-light I could see black shapes, shambling.

“If it hadn’t been for the dark people, the slaves, I think they might have won. They were getting the machines under control again, you see. In the last city the machine might have held out, if the Others hadn’t already been in the city.

“I made the shark swim closer, in through one of the dark cities where I’d gone with the Swimmer. Once it was full of lights and spiral dwellings, beautiful, lithe people gliding among the floating orbits of their homes. Now it was dark. I couldn’t see much—thank God. But the ... black ... figures shambling through those hollow cities, among the floating bodies of the beautiful dead Swimmers, horrified me.” Gresham bit his lip and was silent.

After a while he went on.

“There was still fighting going on around the last lighted place. I made the shark swim into it. I could help, at least, that much.

“The Swimmers fought with curved blades of light that slashed through everything they touched. They were wonderful fighters—terrible and wonderful. I never saw such ferocity and such beauty. But the Others were too many for them.” His voice cracked for an instant.

“The Others were foul, degenerate, dark *things*,” he said, and choked over the words.

“Here, drink this,” Black commanded, holding a glass to Gresham’s lips. Gresham drank, and rested for a moment.

“That was all,” he said presently, in a calmer voice. “I watched it end. I helped as much as I could.” He grinned faintly. “It was one of the Swimmers who killed the shark, finally. They didn’t understand, of course. They must have thought it was just another of the scavenger fish who were

gathering because of the blood. The curved light-blade sheered through it like steel—or fire—fire under water—and the shark died. Well, it was time for me to go, anyhow. I'd done all I could, then. But this isn't the end of it."

"What do you mean?" Black demanded. Then he said quickly, "Never mind. You've got to rest now. You can think it over and tell me later."

"I don't need to think. Remember what I told you when I first saw the Others? How hateful they are even on first sight? Instinct, Black, sheer instinct tells you to kill them on sight. I—I don't know why, but that's what I'm going to do next." He clenched his fist and struck the blanket lightly.

"Extermination!" he said in his hoarse, strained whisper. "Extermination!"

A week later the *Albacore* passed a group of tiny islets lying like scattered flowers on the water. Native outriggers came out, as usual, to offer fruit and gossip. Gresham seemed to know them. He talked briefly in Kanaka, and there was much nodding and liquid chatter among the natives. When the outriggers went back, Gresham went with them.

"I know what I want," he told Black as the neurologist helped him over the rail. "I'm all right now, physically. Or as much as I'll ever be. I'm a responsible man—you can stop worrying about me. I've even got enough money put aside for what small needs I'll have from now on. Forget about me, doctor. And thanks—thanks very much."

Doubtfully, and with a touch of strange, illogical envy, Black watched him go.

The globes that once swung glowing on their cables in the abyss swing dark now. Below them the night land of the sea-bottom stretches far away into a light that shines eternally, a light no human eyes will ever see. Inside the cities which are tombs now, the beautiful bodies of the dwellers float hollow-boned, bare skeletons cleansed by the wandering denizens of the sea. The dead race lies forever entombed in its dead cities.

But a race still lives among them for awhile. A dark, alien race that destroyed its masters and shambles now among the ruins it made. Death lives with that race.

Out of the immense ocean dawn above the ravaging sharks come down silently, one by one, to kill and kill—and be killed. And on an island high over them, in the daylight he cannot see, a blind man sits on his beach with his strange sight focused in another world. A world of water and darkness and death.

He is not blind as other men are blind. He has a thousand eyes to see through. He had a vengeance to wreak. Some day that vengeance will be sated, when the last dark shambler dies. After that, Gresham will be content. He will give up his days then to looking at the world again through the strange, small lenses of other brains, and to the memory of beauty which he once saw so briefly, in the hour of its destruction, and will never see again.

In comparison to the memory of that beauty, all other men are blind.

*** END OF THE PROJECT GUTENBERG EBOOK DARK DAWN

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG LICENSE
PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg™ License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg™ electronic works

1.A. By reading or using any part of this Project Gutenberg™ electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg™ electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg™ electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg™ electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg™ electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg™ electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg™ electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are located in the United States, we do not claim a right to

prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg™ mission of promoting free access to electronic works by freely sharing Project Gutenberg™ works in compliance with the terms of this agreement for keeping the Project Gutenberg™ name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg™ License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg™ work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg™ License must appear prominently whenever any copy of a Project Gutenberg™ work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg™ electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg™ trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg™ electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg™ License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg™ License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg™.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg™ License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg™ work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg™ website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg™ License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg™ works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg™ electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg™ works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg™ trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments

must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."

- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works,

and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES -

Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND -

If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to you may choose to give you a second opportunity to receive the

work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg™ work, (b) alteration, modification, or additions or deletions to any Project Gutenberg™ work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg™

Project Gutenberg™ is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg™'s goals and ensuring that the Project Gutenberg™ collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg™ and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 809 North 1500 West, Salt Lake City, UT 84116, (801) 596-1887. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments

and credit card donations. To donate, please visit:
www.gutenberg.org/donate

Section 5. General Information About Project Gutenberg™ electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg™ concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg™ eBooks with only a loose network of volunteer support.

Project Gutenberg™ eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility: www.gutenberg.org.

This website includes information about Project Gutenberg™, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
